INTRODUCTION

Selection of materials for a school media center or library has never been a responsibility to be taken lightly. As the variety of materials and the squeeze of inflation increase, it becomes even more important to exercise care in selection to insure a quality collection to support the curriculum.

A statement of selection policy and procedure, expressing the philosophy of selection, delegating responsibility for selection, and including criteria to guide selection, weeding, acceptance of gifts, and handling of challenged materials is essential. Selection of Instructional Materials, a Model Policy and Rules, published by the Department in 1975, and Policies and Procedures for Selection of Instructional Materials published by the American Association of School Librarians in 1970 with a new edition to be published in 1976, provide guidance to school districts in the development of such statements. While they apply less directly to Area School Learning Resource Centers and Area Education Agency Media Centers, they can at least point up the need for selection policy and procedure statements.

Involvement of teachers and students in the selection process, while assigning find responsibility to the librarian or media specialist, is vital. However, actual examination of all materials by either teachers or library or media center staffs has become impossible even if desirable.

Use of reliable reviews, bibliographies and finding lists can help the librarian or media specialist narrow the search while still avoiding irresponsible dependence on pre-selected packages. For this reason the following list of selection and finding sources for print and nonprint materials is submitted. It attempts to include lists which relate to many different subject areas, skill levels and formats for pre-school through area school students and teachers. Few libraries or media centers will need all of the titles, but all should be able to find some helpful entries in this selection bibliography.

Basically, inclusion in the list has been limited to titles not over five years old, still available, and of at least some possible use to public school media centers, area school learning resource centers, or area education agency media centers. With very few exceptions the titles are separately published books, pamphlets, or periodicals rather than articles. Because some may wish to explore further, several widely known bibliographies of bibliographies are included. Descriptive and evaluative annotations are provided where possible.
